

COVID-19

SHOWING YOUR HOME HELPFUL PROCEDURES

TO ELIMINATE VISITORS DIRECTLY TOUCHING AREAS AT YOUR HOME:

- Please turn all lights on
- Open walk in pantry doors, walk in closet doors, open the slide closet doors 1/2 way
- If you have a door leading to your basement please open it
- Bedroom and office doors open for direct entry
- If you have pull out drawers in your kitchen cabinets please open one
- Either leave a paper towels near the door knob to use for opening your garage door or leave the door open and turn the light on to the garage

Look through your home and look carefully at how an agent and buyer could easily tour your home without touching any extra areas

If you have unfinished areas of the basement please turn light on (pull string fixtures turned on as well)

After your showing please concentrate on cleaning your entry and exit door handles and railings/banisters

Deck or patio door knobs should be wiped down

The agents and buyers are instructed not to use bathrooms, faucets or to touch drawers or cabinets

We all want to remain safe and aware of client concerns

Please direct any questions to me directly
